

Confidence in posture solutions

Azalea®

Offers excellent postural support
and comfort with many adjustment
possibilities!

The *Rea Azalea* is the natural choice for managing all aspects of postural support and comfort. It is available in three chassis sizes with options of both transit wheels for attendant propulsion, or self propel wheels for the moderately active individual. The seating system is versatile in its wide choice of support options and in the adjustments it offers. Making the *Rea Azalea* the market leader in tilt in space wheelchairs.

Tilt & recline makes life comfortable

The *Rea Azalea* offers 25° of seat tilt and 30° of backrest recline to accommodate a range of positioning requirements. Both tilt and recline are easily adjusted by attendant operated gas pistons, supplied as standard. As an option, there is also an electric version to give the client independence over their own position and comfort.

Pivot points on the chair closely match the natural pivot points of the person, ensuring synchronised movements between the client and the chair, greatly reducing the risk of sheer during tilt and recline. For additional safety and confidence for the client, the unique Dual Stability System (DSS) of the *Azalea* incorporates weight shifting when tilting and reclining, to ensure stability is maintained.

Features and Options

Flex 3, backrest plate

Sturdy and supportive, with both width and height adjustments. Available with a range of cushions.

Flex 3, tension adjustable backrest

To accommodate more complex spinal shapes, the tension adjustable backrest offers multiple adjustments, suitable for male and female body shapes of all sizes.

Wide range of options

In addition to the multiple adjustments in the chair the *Azalea* boasts a large assortment of options and accessories, ensuring there is a solution for a wide range of postural challenges.
