

Start M1 and M2

The Start range of lightweight manual wheelchairs, which have a range of options to ensure that the chair will fit all your comfort and mobility needs. Along with being crash tested this chair can also be folded compactly to fit into the boot of your car.

The Start M1 is an entry level folding manual wheelchair, which is available in 7 pre-assembled versions, each with an aluminium frame. The development of this product took into consideration the aim of a low weight chair that has the capacity of carrying 125kg. The options you can have with this wheelchair allow your customer to gain independence even if they are only needing to use the chair for short time.

The Start M2 is a fully configurable, high quality wheelchair which can be built specifically to meet the needs of your customer. With the options available the Start M2 is a chair that can be suitable for people with hemiplegia or cerebral palsy along with other conditions. The rear wheel adjustment for optimum stability.
